Tuesday, February 5th, 2019

1:30 PM – 3:30 PM

or

Friday, February 8th, 2019

9:30 AM – 11:30 AM

Kona Cooperative Extension Service
Conference Room (2nd floor)
79-7381 Mamalahoa Highway
Kealahou, HI 96750

Agenda

- Welcome & Introductions
- CBB Biology
- Current IPM Recommendations & Research
- *Beauveria* Subsidy Program
- Q&A, Evaluation

Coffee Berry Borer (CBB) is a damaging pest of coffee. This beetle bores into the fruit and damages the seed, thus affecting coffee yield and quality. If left unmanaged, CBB can cause over 80% cherry infestation and lead to immense damage to the Hawaii coffee industry. CBB is controlled using integrated pest management (IPM), which uses a combination of different techniques, as no single method will control CBB on its own.

UH-CTAHR welcomes new and beginning coffee farmers or those seeking a refresher, to join us at this informational CBB 101 workshop which will provide participants the opportunity to **learn about CBB biology and current IPM techniques**. The Hawaii Department of Agriculture *Beauveria* subsidy program coordinator will be on hand to talk about their subsidy program that assists coffee producers with the cost of *Beauveria* products.

This free event is hosted by UH-CTAHR and funded by the college and USDA.
