Coffee Berry Borer IPM 101 Workshop - Kona

Registration is required.

RSVP at www.hawaiicoffeeed.com/cbb-101 or by contacting Matt at (808)322-0164 at least 2 days prior—on a first come first serve basis.

Pre-registered participants will receive a CBB IPM and recordkeeping binder. One binder per farm.

Wednesday, January 29th, 2020

9:00 am—11:00 am

Kona Cooperative Extension Office

79-7381 Mamalahoa Hwy.

Kealahou, HI 96750

AGENDA

- Welcome & Introductions
- CBB Biology & Basics
- Current IPM Recommendations
- Beauveria Subsidy Program
- Q&A, Evaluation

Coffee Berry Borer (CBB) is a damaging pest of coffee. This beetle bores into the fruit and damages the seed, thus affecting coffee yield and quality. If left unmanaged, CBB can cause over 80% cherry infestation and lead to immense damage to the Hawaii coffee industry. CBB is controlled using integrated pest management (IPM), which uses a combination of different techniques, as no single method will control CBB on its own.

UH-CTAHR welcomes **new and beginning coffee farmers** to join us at this informational CBB IPM 101 workshop which will provide participants the opportunity to learn about CBB biology and the basics for controlling this pest with current IPM techniques. The Hawaii Department of Agriculture's Beauveria subsidy program coordinator will be on hand to talk about their program that assists coffee producers with the cost of approved-Beauveria products.

This free event is hosted by UH-CTAHR and HDOA and funded by the college and USDA.

For information or to request an auxiliary aid or service (e.g., sign language interpreter, designated parking, or materials in alternative format), contact Gina at (808)322-4892 or Matt (mnmiyahi@hawaii.edu) at least seven days before the activity/event.
